

**VALENTINA
CONTINI**

**I talk about
the weird places
technology is going.**

FUTURES ENGINEER / EMERGING TECH RESEARCHER / SPEAKER

Engineer
by training.
Futures researcher
by curiosity.
Professional Black Sheep
by temperament.

I investigate emerging technologies, turn questions into experiments, and build prototypes to find out what survives contact with reality.

AUTOMOTIVE R&D / STRATEGY / FORESIGHT

I started in automotive R&D, with Lamborghini and Porsche Engineering, before moving upstream into strategy, innovation and foresight in a global tech company.

01 / FLAGSHIP KEYNOTE

Welcome to the Collision Zone

AI, robotics, quantum, biology and the increasingly messy future of technology.

The next technological shift probably will not arrive neatly labelled. The interesting things happen where technologies collide.

02

The Robot Is Not the System

Rethinking Physical AI beyond humanoid demos.

03

The Future Refuses to Be Computed

Foresight when prediction stops being the point.

04

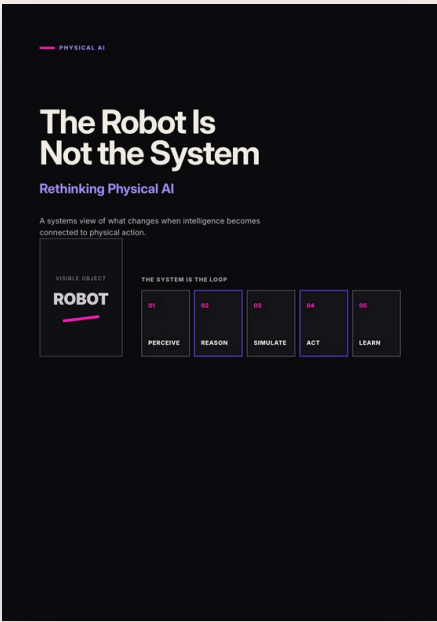

Playing the Future

Games, simulations and interactive worlds as futures instruments.

The talks come from the research.

Not the other way around.

Research-led.
Practical.
Opinionated.

Playable futures

Bionics Physical AI

FIVE-PART RESEARCH SERIES

- 01

When Machines Start Borrowing the Logic of Life
- 02

The Body Is Part of the Algorithm
- 03

Where the Machine Ends
- 04

When the Robot Becomes Part of You
- 05

After the Robot

ON STAGE

I have done this before.

SELECTED STAGES & AUDIENCES

Web Summit

SAP

Volkswagen

Vodafone

Hubert Burda Media

Bechtle

FuturX

Stuttgart Region

Innov8rs

House of Beautiful Business

**Provocation
with receipts.**

BOOKING

Bring me an interesting rabbit hole.
